

# Dishwashers.

## *Logixx* ActiveWater

Our premium range, with exceptional cutting-edge features and extras. Featuring ActiveWater technology, heat exchanger drying, automatic wash programmes, and a wealth of other cutting edge features, the Bosch Logixx models are not only the world's most powerful dishwashers, but also the world's most economical\*.

## *Exxcel* ActiveWater

Mid-range models with a broad range of extra features and benefits. They offer greater capacity, use less water, are quieter, and boast more features than the basic models. Like the automatic daily programme, or the powerful IntensiveZone function and the amazingly flexible Vario and VarioFlex basket systems with Rackmatic™.

## *Classixx*

Simple, practical models offering Bosch build quality and value for money. But they still feature the triple-A rated performance that comes with all our dishwashers, and a host of useful features, including the large item spray head, the convenient half load option, and the 29-minute quick-wash programme.

\* As of January 2008. Combined water and electricity consumption for a standard programme on a Bosch Logixx dishwasher.

# The world's most economical dishwasher is also the world's most powerful dishwasher\*

## **Maximum performance meets minimum consumption**

ActiveWater from Bosch – Nothing less than the invention of a revolutionary new dishwashing system that uses every single drop of water to the maximum, and makes these dishwashers the most efficient ever to leave the production line.

# ActiveWater

## Technology serves economy

This incredible increase in efficiency of the ActiveWater dishwasher models has been achieved through the development of a new dishwasher system that maximises water efficiency during rinse cycles: faster heating, optimised filter system, targeted water distribution and improved pump performance. For the new ActiveWater dishwasher this spells: less water, less energy, more performance.

\* As of January 2008. Combined water and electricity consumption for a standard programme on a Bosch Logixx dishwasher.

# Dishwashers features and benefits.

## Performance

### AAA performance

At Bosch we are aware of the importance of energy efficient and environmentally friendly appliances. We are so confident of the quality and efficiency of our dishwashers that we offer AAA rated appliances in all our full size and slimline models – making our models the most efficient in the world.

### 5 spray levels

The uniquely designed curved spray arms distribute water precisely and effectively, ensuring perfect results every time. The water is sprayed on five different levels for maximum performance, including a downward spray to ensure that the filter area is kept permanently flushed clean.

### Hydrosensor III

Checks the degree of soiling in the prerinse water and decides whether it is clean enough to be used for the main wash cycle. If the water contains only a small amount of soiling, the water is reused. Around 20%, or 4 litres, of water can be saved using the HydroSensor.

### Heat exchanger

The unique heat recycling reservoir maximises performance by using heat that is generated in the main wash to pre-heat cold water used for the rinse cycles before it enters the dishwasher. Pre-heating the water minimises the risk of thermal shock which can occur when cold water strikes warm delicate items which can cause cracking or breakages. As an additional benefit this system is also an extremely energy efficient method of heating the water.

### Detergent aware

No matter which detergent you use – 5in1, 4in1, 3in1, 2in1 tablets or separate components – all our dishwashers will adjust the cycle to ensure that you always get the best possible results – every time. (Note that to ensure these results dishwasher salt should always be used).

### DosageAssist

Maximises the effectiveness of detergent tablets. The detergent dispenser is conveniently located in the centre of the top of the door, where it is protected from food remnants that drip whilst loading the dirty dishes. At the beginning of the wash cycle, the tab drops into a special tray in the top basket where its dissolving is controlled to assure outstanding results. This prevents tabs dropping down between plates or cutlery, or not dissolving completely, resulting in a less-than-perfect cleaning performance.

**IntensiveZone**

To save you the chore of scrubbing heavily soiled pots and pans, the entire bottom basket can be transformed into a power cleaning zone with increased spray pressure and a higher cleaning temperature, while in the top basket delicate glasses and dishes are rinsed gently and protectively.

**AquaMix**

Bosch AquaMix allows you to wash your delicate glasses with complete confidence. By regulating the level of water hardness in the machine and topping up with water directly from the mains it produces the best water hardness level for glass, ensuring a sparkling finish every time.

**Advanced filter system**

Our easy to remove and clean filter system now has 50% more surface area. This allows for up to 15% more water to be circulated through the system, so that even more cleaning power can be squeezed from every drop of water.

**Hygiene Exxtra**

Select the new Hygiene Exxtra option for a hotter final rinse – perfect for cooking utensils, glass jars, chopping boards and baby bottles.

**Safety**

**AquaStop 24-hr flood protection**

All Bosch dishwashers have flood protection systems, but for added peace of mind, most models feature 'AquaStop', a device that cuts off the water supply in the case of leaks, and a safety water valve to guard against siphoning, even when the machine is switched off.

**Safety lock**

The control panel or door can be locked to stop little fingers from interfering when the machine is running.

# Dishwashers features and benefits.

## Convenience

### VarioSpeed

Optionally reduces programme times by up to 50%, but without compromising on quality. So you still get hygienically clean and dry dishes, but in as little as half the time – ideal for busy households and when entertaining.

### Large item spray head

Makes light work of baking trays or oven shelves, without the need for pre-soaking. Simply remove the upper basket, attach the large item spray head, and get powerful cleaning where you need it. The large item spray head comes as standard with all Bosch dishwashers – and on Exxcel and Logixx models, it's now even larger.

### Half load

If you don't have enough for a full load and can't wait, simply load the crockery, plates, pots and pans anywhere in your dishwasher, select the programme temperature and press the half load button. The programme time is reduced and up to 30% less water is used.

### 14 place settings

There is enough space for 14 full place settings in the Logixx ActiveWater dishwashers with VarioDrawer. Or, put into figures: 14 dinner, soup and dessert plates, 14 cups and saucers, 14 glasses and 14 cutlery settings – knife, fork, soup, tea and dessert spoons, plus 1 oval serving plate, 2 serving bowls, 2 serving spoons, 1 serving fork and 1 sauce spoon.

### Vario, Varioflex or VarioFlexPlus baskets with Rackmatic™

With the enlarged loading area, the Bosch basket systems featured in the Exxcel and Logixx models offer more capacity, up to 14 place settings, and greater flexibility. With up to six foldable racks the system can be adapted to any load, and all items are assured a firm, secure place in the protective racks. The new 3-stage Rackmatic™ system makes it a simple matter to adjust the height of the upper basket, even when it is fully loaded – normally a cumbersome task. With three different loading heights a large variety of plates, glasses and other dishes can easily be accommodated.

**The VarioDrawer**

A unique feature of our new top-of-the-range Logixx dishwasher interior is a third loading level – the VarioDrawer. It replaces the cutlery basket, freeing even more space in the bottom basket. The VarioDrawer is easily removable to allow loading and unloading of cutlery, and there is even room for espresso cups and kitchen utensils. And what’s more, even with the drawer in place you can still load long-stem wine glasses in the upper basket.

**Logical control**

All our machines feature water supply, salt and rinse-aid indicators, as well as displaying remaining programme time and start time delay.

**Bosch recommends Finish**

Use Finish to get amazing results every time you open your Bosch dishwasher. Finish have a complete range of products to suit your dishwashing needs, including new Finish Quantum which combines the power of three separate ingredients in one single product to give you amazing shine and clean.

A range of enhancers are also available such as Finish Intensive Clean & Care Dishwasher Cleaner which removes grease and limescale to maintain your machine’s performance and give you perfect results in every cycle.

**Logixx** semi-integrated 6-programme dishwasher  
**SMI69T05GB brushed steel**

86.5cm model compared with a standard dishwasher

### Larger interior for added convenience

An additional benefit of the SBV69M10GB dishwasher is that it has an extra 5 cm of interior space. This means that even larger than normal items can be washed comfortably. For example if the top basket is adjusted, plates as large as 33cm can be accommodated in the lower basket. With its height adjustable feet the SBV69M10GB is suitable for niche heights from 865mm – 925mm.
