

Built-In Appliance Collection

 **Hotpoint**

OUR IDEAS. YOUR HOME.

Our ideas. Your home.

Home is the one place that truly reflects and expresses who you really are and want to be. At Hotpoint we pride ourselves in understanding your needs and develop our products and features around you and your family.

Hotpoint's built-in collection offers you the complete kitchen solution. From stylish ovens, hobs and hoods to fully integrated dishwashers, washing machines and refrigeration appliances we have something for everyone. And for those brilliant finishing touches our coffee maker, wine cellar and award winning fridge drawers will make your kitchen the envy of all.

Welcome to Hotpoint...

Heritage and Reputation

Hotpoint's illustrious history began in the early 1900's. Since then we have made it our aim to listen to you and provide you with intelligent product solutions to ensure you live in comfort and style in your home. Hotpoint is the number one white goods brand and has been voted the most Trusted Domestic Appliance Brand every year for the past nine years in the annual Reader's Digest survey*.

Hotpoint has also been identified as one of the UK's strongest brands forming part of the Superbrands group. Superbrand status is awarded to those brands that have established the finest reputation in their field and represent Quality, Reliability and Distinction.

Our Commitment to the Environment

Hotpoint cares for the environment. Every year we make choices that not only ensure strict compliance with environmental legislation but also aim to develop advanced technological solutions that make our products even more eco-compatible. Features such as A+ in energy efficiency and our Eco Cycles and settings ensure we are helping you to help the environment when using our products.

Our Commitment to ChildLine

Hotpoint recognise that for some, family life may not be all that we want it to be. That's why Hotpoint supports ChildLine, the UK's free 24-hour helpline for children and young people#.

...Intelligent solutions for living in comfort and style

* Data based on UK statistics

ChildLine is a service provided by the NSPCC, registered charity numbers 216401 and SC037717.

Wine Cellar WE26X

Style

Hotpoint's Style range gives you all the functions you need for all-round performance and offers an array of colour options such as Black, White, Brown, and of course Stainless Steel.

Models shown are:
Single Oven SY36X
Gas Hob GF640X
Cooker Hood HD6TX
Fully Integrated Dishwasher LFT228A

Ovens

Which is the right choice for you?

Single

Neatly installed in a unit or under a counter, single ovens offer convenience and functionality. Sleek, smart and elegant in design ensuring you achieve the look you desire in your kitchen.

Openspace

The revolutionary design means Openspace has 20% more space than a standard 60cm single oven, giving you a huge 70 litres. Then insert the divider to create a double oven with two independent cooking zones.

Built-In Double

Fully flexible, with two ovens that you can use individually or at the same time giving you maximum capacity and flexibility. Installed in a taller unit, you can have everything at eye level for ease of use.

Built-Under Double

Conveniently fitted under a worktop, slide into position on legs, our built-under ovens offer all the advantages of a built-in double oven but in a slightly smaller space, giving you the advantage of two ovens where you thought you may have only had room for one.

Intelligent Cooking System

Intelligent Cooking System

Hotpoint's Intelligent Cooking System consists of a selection of dedicated pre-set cooking functions that help you achieve perfect results every time.

From bread and pizza functions to roasts and cakes, you can rest assured they will be cooked to perfection as the oven monitors and adjusts the time, temperature and humidity within the cavity so it's always at its optimum.

With four intelligent cooking functions on single ovens and six on double ovens, you'll have all the ingredients you need to let the oven do the work for you while you sit back and relax!

Bread

Crisp and golden outside, soft and well cooked on the inside: with this function you put freshly baked bread on the table, as if it was fresh from the bakery. The cooking function automatically defines the different phases of cooking and proving, stabilising the temperature with an electronic thermostat, allowing you to cook different sized loaves at the same time to perfection.

Roast

Beef, lamb...any meat can be cooked faultlessly with this cooking programme. The oven takes care of the different phases of cooking, raising the temperature at the start, then browning, cooking the inside, then lowering the temperature and turning on the fan at the end to start to relax the meat and ensure it doesn't dry out. You can even adjust the cooking level to choose from well done, medium or rare.

Roast Chicken (double ovens only)

This function is specially designed to roast chicken and poultry to perfection, with the crispiest skin, and the most tender meat.

Pizza

Can you make a pizza at home, with fresh dough that tastes like it was cooked by a Pizzeria? With the Hotpoint Intelligent Pizza Function you can cook a homemade pizza in just 30 minutes. Use the dough recipe included with the oven, and create your own pizza.

Cakes

With the help of your Hotpoint cook book and this fantastic cooking function, you can prepare tortes, tarts, choux pastry and cakes perfectly. With no pre-heating time required, you can save time as well as energy with this function!

Fish (double ovens only)

Using gentle pulses of heat from the elements in the cavity, this programme will ensure that your fish is poached precisely every time.

Oven Features

Fast Clean - Pyrolytic Cycle

To keep your oven as clean and shiny as the rest of your kitchen, simply use the Fast Clean Pyrolytic Cycle. The quadruple or triple glazed doors automatically lock, the oven heats to 500°C and burns off all the fat and waste leaving a small deposit of ash for you to simply wipe away. The process is completely safe and costs less than 50p each time!

Steam Cooking

Looking for a healthier way of cooking? Hotpoint's Steam Oven is a fast, healthy and convenient way of sealing valuable vitamins and minerals into your food. Taste is maintained as there is no flavour transfer, so different dishes can be cooked together.

Multifunction Oven

Multifunction ovens are the optimum choice for anyone who takes cooking seriously. Giving you total control with maximum flexibility, there's a wide choice of multifunction ovens with between five and thirteen separate cooking programmes.

Electronic Control

A perfect blend of high tech and contemporary design, our top of the range ovens are electronically controlled. The oven temperature is maintained at a constant level to provide even heat and optimum cooking performance.

Touch Control

The ultimate in sophisticated technology, our touch sensitive panels deliver precision cooking to your fingertips. Available as Touch Control on Glass or on Stainless Steel, the technology offers you total control with ovens that are efficient, easy to clean, and a pleasure to use. They look fantastic too!

Touch Control on Glass

Touch Control on Stainless Steel

Telescopic Shelf

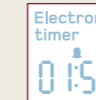

An innovative feature that's strong on safety as well as practicality. This extendable shelf is self-supporting so you can take dishes in and out of the oven, check on progress, taste or stir, safe in the knowledge that the shelf won't tip. You also get a deep dish with each oven that has a telescopic shelf.

Solarplus Grill

Found on all Experience double ovens, the Solarplus Grill gets to full temperature after only 15 seconds and it is 20% quicker than a conventional grill. The grill mesh is also practically self-cleaning saving you valuable time and inconvenience.

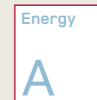

Electronic Timer

No need to plan your life around meals, the programmable timer means you can set the start and finish times to suit the demands of your day and your cooking.

A Energy

Without compromising on performance, A energy rated products use less electricity, saving you money and reducing the impact on the environment. Hotpoint ovens are among the most energy efficient you will find with AA ratings for all our Experience built-in double ovens and A for all of our Experience single ovens.

Oven Functions

Circulaire® Fan

Programme

Fan and rear element circulates even heat between shelves.

Benefits

Reduce cooking time by 20% and temperature by 10-20°C compared to a conventional oven. Ideal for pastries and batch baking.

Multi-Cooking

Programme

Combination of all heating elements coming on alternately with the Circulaire Fan at reduced power.

Benefits

Uniform heat distribution enables cooking of different types of dishes on more than one shelf. Ideal for lasagne & pasta bakes.

Fast Cooking

Programme

Combination of all heating elements coming on alternately with the Circulaire Fan at full power.

Benefits

Uniform heat distribution enables cooking of several dishes at once. Cooks fresh food 20% quicker than conventional. Ideal for ready meals.

Pizza

Programme

Combination of the Circulaire Fan and bottom heat.

Benefits

Guarantees rapid baking of dough or pastry. Bottom element ensures a crispy base and the rear element delivers a perfect finish.

Fan Assisted Cooking

Programme

Combines conventional cooking with the fan.

Benefits

Ensures a more even temperature throughout and a quicker finish than conventional ovens.

Proving

Programme

Oven is heated to 40°C.

Benefits

For proving dough made with yeast.

Circulaire® Roasting

Programme

The same as Circulaire Fan cooking but allows hot air to be circulated underneath the food.

Benefits

Excess fat falls into the pan rather than soaking back into the meat - achieved with a raised trivet.

Low Temperature 40°C

Programme

Fan and rear element circulates air at 40°C between shelves.

Benefits

Reduces defrost times by half and proves dough to perfection.

Conventional

Programme

Combination of top and bottom heat. Warms food by natural convection.

Benefits

Ideal temperature in centre of oven. Great for home baking.

Low Temperature 65°C + 90°C

Programme

Combination of Circulaire heating element and reduced power grill for 90°C, or low power grill for 65°C.

Benefits

90°C cooks casseroles to perfection. 65°C ideal for plate warming.

Defrosting

Programme

Uses the Circulaire Fan to circulate ambient warm air around the food.

Benefits

Speeds up the time taken to defrost food.

Solarplus Grill

Programme

A variable heat control and half grill option to ensure maximum performance and flexibility.

Benefits

Heats up in 15 seconds and is 20% quicker than a conventional grill.

Fan Grilling

Programme

The grill element is used with the Circulaire Fan to circulate heat all around the food.

Benefits

Great for browning, crisping and gratin finishes, giving the same results as a rotisserie.

Variable Grilling

Programme

Central top element comes on. Variable heat settings to suit your cooking needs.

Benefits

Half grill option* providing a solution for small portions with maximum performance.

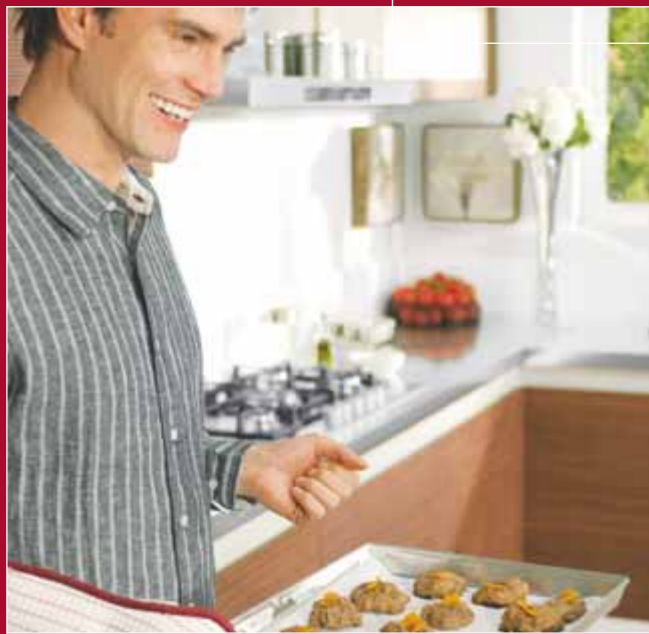

* Not available on Openspace models

Oven Range

Experience Ovens

Introducing Hotpoint's flagship range. As you'd expect, we've taken care of every detail, chosen easy to clean materials, and made sure that the way the oven looks is simply stunning. With a choice from five to thirteen functions, you can be sure that the Hotpoint Experience range will have something for you. With fingerprint resistant Stainless Steel as standard on all Experience Steel ovens, and Pyrolytic Fast Clean on selected models, you can relax in the knowledge that your oven will look as good inside and out as on the first day you bought it.

OPENSOURCE

Double oven
versatility, single
oven space

20% more space than
a standard single oven
within the same dimension.
The revolutionary design
gives you a huge 70 litres
capacity, with the ability to
cook on four levels at once.

But the brilliance doesn't stop there. On selected models you can convert this extra large space into a double oven by simply inserting the insulating divider to create two separate cooking zones; both with independent time and temperature controls.

OPENSOURCE

What's the big idea?

Just add the divider and you have a double oven

Oven Features

Extra Large Space

Extra Large Space offers 10 cooking programmes including Hotpoint's 4 Intelligent Cooking Functions. It can be used as one extra large space or 4 shelves at once.

Double Space

On models featuring the divider both Small and Main Spaces can be used at the same time and at two different temperatures with independent programmable timers. The divider is fully insulating so there is no transfer of flavours between the two compartments.

Main Space

The divider allows the use of just the bottom two thirds of the oven as a fan oven.

Small Space

The divider allows the use of just the top part of the oven. There are two functions in the Small Space:

- Fast Cooking
- Grill

Energy Conscious

Openspace is seriously energy conscious with savings of up to 25% on energy and up to 40% in heat-up time* with the newly designed fast heating grill. With the Fast Cook programme in the Small Space oven you can save up to 40%# on total cooking time, and because you are saving on time you are saving on energy too.

* compared to our standard grill
versus cooking a frozen pizza in a standard single oven

A Rated

As you would expect from Hotpoint, Openspace is A energy rated whichever oven compartment you choose to cook with.

LCD Display

The intelligent LCD display tells you all you need to know about the cooking programmes selected. It shows the oven spaces in use and alternates between the temperature, the time left to cook and the clock.

Fast Cooking

Save up to 40%* in total cooking time by using the Fast Cooking option. The Small Space uses the powerful inner element to pre-heat the oven and then switches to the outer element for ongoing cooking at a more gentle heat. Ideal for ready meals and pizzas.

* Compared to cooking a frozen pizza in a standard single oven.

Total Electronic Control

Openspace features total electronic control, with independent time and temperature controls for both the Small, Main and Extra Large Spaces. So when you are in Double Space mode you can set separate times and temperatures for each space ensuring all your dishes are cooked to perfection.

Product Range

Experience 48cm High Ovens & Warming/Storage Drawers

A new concept in cooking – Hotpoint's 48cm high single ovens.

Unlike other compact ovens our 48cm ovens provide the same capacity as our standard 60cm ovens but fit into a smaller area in your kitchen to free up valuable space.

The ovens are available with a drop-down door and offer the latest in design and technology. There is also a Pyrolytic Fast Clean oven to cope with the most demanding situations.

Unique in design, the oven controls are on the handle to provide a sleek and stylish look. This, along with the benefits of our advanced Intelligent Cooking System and fingerprint resistant stainless steel finish, demonstrate that these ovens really are at the cutting edge of modern cooking.

Warming & Storage Drawers

The 12cm storage drawer makes sure that whatever you're doing, everything you need is immediately to hand. You can use it with one of our 48cm ovens or, alternatively, use it with our coffee machine to store espresso cups, cocoa powder or sugar.

There is also a 24cm warming drawer, ideal if you like to entertain, enjoy having warm plates or want a convenient place to prove dough.

Steam Oven

Hotpoint's Steam Oven is a fast, healthy and convenient way of cooking that seals valuable vitamins and minerals into your food.

Food is surrounded by steam at exactly the right temperature to seal in vitamins and minerals and preserve textures. The Steam Oven maintains taste and avoids flavour transfer when cooking different dishes at once, giving better food appearance and smell. The cellular structure of food at low temperatures is maintained which avoids over-cooking.

Excellent for portion control, steam cooked dishes will not reduce in size compared to grilling or roasting and with no fat or oil required it is a low-fat method of cooking.

SEO100

Combination Oven & Microwaves

With today's busy lifestyle, the microwave oven is practically indispensable as a time and money saver. Hotpoint offer built-in microwave ovens that can be installed either in a tall housing unit, or in a shallow wall cupboard. Hotpoint's combination oven offers you all the benefits of a microwave, with the ability to brown and grill like a fan oven, meaning you can cook your favourite meals much quicker than you would normally.

Combination Oven & Microwaves

- Prepares 1 or 2 Cups Simultaneously
- Suitable for Espresso Cups to Large Mugs
- Timer Function
- Can Store up to 300g of Coffee Beans and 1.7L of Water

60cm Built-In Coffee Maker

Finish: Stainless Steel (X) - Fingerprint Resistant

Hobs

Which is the right choice for you?

Electric

Ceramic and Induction electric hobs offer a sleek, streamlined look in the kitchen. With slim glass cooking surfaces they are easy to clean, and our Induction hobs are as easy to control as gas.

Gas

Extremely controllable and easy to use, gas hobs are the choice for cooking enthusiasts. Most Hotpoint gas hobs are available in several colour options with many also available in stunning stainless steel.

Different Widths

Whether you want a run of three or more 30cm hobs, or you prefer the design and functionality of our 75cm or 60cm hobs, you can be sure that Hotpoint have the hob for you.

Hob Features

Induction

Energy efficient, clean, safe and controllable. Induction cooking uses a magnetic field to generate heat instantly, which is only activated by the presence of a pan. Only the cooking zone becomes warm, leaving the rest of the hob much cooler than on an ordinary ceramic hob which makes cleaning any spills a breeze as they don't burn on.

Ceramic

Ceramic hobs offer the finishing touch to your kitchen, with sleek black glass on its own, or enhanced by a full frame or frontal profile. With touch control, or ergonomically designed control knobs, ceramic hobs look sensational and provide rapid heat - saving you time and money versus sealed plate hobs.

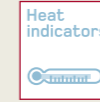

Touch Control

Hotpoint's touch control hobs give you not only smooth, easy-to-clean lines but also offer great functionality and precise temperature control. Once the temperature is set, you can lock the control panel for extra safety and it will automatically switch off if a large spillage occurs.

Residual Heat Indicators

Residual Heat Indicators are an invaluable safety feature. The indicators light up to tell you if the surface of a ceramic hob is still hot, even after you have turned off the controls.

Gas

Gas cooking is versatile and controllable, whether you're keeping sauces warm on a small burner, or stir-frying on one of the triple-ring wok burners. All our Experience gas hobs feature a flame supervision device that cuts off the gas if the flame goes out, and we also offer a choice of cast iron or enamelled pan supports.

Triple Ring Wok Burner

Short on time, and everyone's hungry? The art of Chinese stir frying is in the power and the heat of the wok burner. This innovative triple ring makes the most of the power of gas and allows quick and uniform cooking, and thanks to its design delivers better heat distribution under the pan.

Double Ring Burner

This powerful burner is capable of cooking whatever you want, in the best way, quickly! The flame can be regulated independently on each ring of the burner (from 0.9 to 5.0 kW) and you can use the burner for anything from a small cafetière on the lowest setting, to a huge pan of boiling water on the highest setting.

Hoods

Which is the right choice for you?

Benefits

A cooker hood is a feature of your kitchen, as well as being functional. Hotpoint offers cooker hoods to suit your style, from 90cm touch control hoods, to angled glass designs. Many even come in a variety of colours so you can choose a hood to co-ordinate perfectly with your kitchen design.

Extraction Rates

To find out if your chosen hood is suitable for the kitchen, take the volume of the room in cubic metres, and divide by the maximum extraction rate of the hood. The higher the result the better, but as long as the answer is over six, then the hood is suitable.

Widths

Hotpoint offer a choice of widths, from 60cm to 100cm wide. Choose the hood depending on the width of your hob. Whether you want coloured, angled or curved glass or professional looking stainless steel, Hotpoint has the hood for you.

Dishwashers

Which is the right choice for you?

Fully Integrated

Need a dishwasher, but don't want to spoil the seamless lines of your kitchen? Fully integrated models offer all the innovative features you'd expect from Hotpoint, but you get to choose a door panel to fit with your kitchen design.

Slimline

Smaller household, or just not the space for a full size dishwasher? A slimline model reduces the water used for dishwashing, and has the same AAA energy rating as the top of the range standard dishwashers.

Semi-Integrated

Semi-integrated dishwashers still allow you to fit a décor panel to your dishwasher. However, on these models the control panel, which can be in a range of colours to suit your furniture and other appliances, is clearly visible.

Dishwashing Features

Delay Timer

Set the dishwasher to start when it suits you and make the most of lower priced electricity tariffs with up to 24 hours time delay.

Baby Cycle

An intensive wash cycle designed to cleanse and remove harmful bacteria from dishwasher-safe crockery and cutlery used to feed babies and young children, to give you further peace of mind when caring for your family.

Eco Wash

An environmentally friendly wash cycle combining low energy consumption levels with great cleaning performance.

Rapid 27

This ultra fast cycle has been developed to wash lightly soiled items in just 27 minutes, leaving you free to get on with more important things.

Daily 60

This new wash programme has been designed to wash a typical load of 4-6 lightly soiled place settings within just 60 minutes, whilst achieving an A class wash performance.

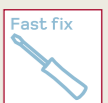

Dual Space

The new Dual Space system on selected full size dishwashers allows you to adjust the height of the top basket in one quick and easy movement, even if you've already fully loaded it, which means you can have more room in the lower basket for larger items.

Fast Fix

A unique hinge mechanism enables the appliance to be neatly installed without cutting the plinth and then our patented Fast Fix system allows the front décor panel to be fitted in minutes, even if the dishwasher has already been installed.

Washing Machines & Washer Dryers

Laundry Features

Baby Cycle

Let Hotpoint help look after your little one's clothes. Our new Baby Cycle has been specially designed to tackle the toughest of stains typically associated with babies and young toddlers, including baby food, fruit yoghurt, mud and grease, giving visibly better results when compared to using a standard 40°C cotton wash cycle.

Lingerie Cycle

Our new Lingerie Cycle is gentle enough to wash typically delicate lingerie items such as lace and satin underwear and nightwear, whilst still giving great wash performance.

Shirts Cycle

A cycle designed to wash shirts with care and, thanks to special programming, ensures that creasing is reduced to make ironing easier.

Laundry Features

Woolmark Platinum Care

All our Hotpoint washing machines feature this special programme endorsed by Woolmark*, the world's leading authority on all wool items. Extra gentle agitation and low spin speeds help to eliminate any friction between the fibres of wool garments, thereby ensuring a perfect wash.

*In the UK and Eire the Woolmark is a Certification Trade Mark

Fast Wash Programmes & Time Saver

From our 30 minute Eco Fast Wash to a Time Saver function, Hotpoint washing machines offer the ultimate in convenience, with different options to choose from to help you get through the laundry more quickly.

5+5kg Wash and Dry Load

All our Hotpoint washer dryers have the capacity to wash and dry a 5kg load in a single uninterrupted cycle.

Ready to Wear Cycle

This extra fast programme has been designed to **wash and dry** a small load of lightly soiled garments in just **60 minutes**, making it perfect for refreshing an outfit the same day or night you need it...or even an urgent school uniform wash.

Hotpoint and Ariel Embrace Energy Saving Washing

Get great cleaning and save up to 50% energy*

Hotpoint and Ariel have worked in partnership to develop a selection of energy saving Eco Cycles. Using the cleaning power of Ariel together with Hotpoint's advancement in washing technology, you can get great cleaning even at low temperatures and save electricity – perfect for helping you save money and do your bit for the environment.

Our 3 unique Eco Cycles include: Cottons, Synthetics and a Fast Wash. Choosing the Eco Cycles will help you to save up to 50% of the energy used... definitely worth considering for your daily washing.

*Compared to an equivalent 30°C cycle. Hotpoint recommends the use of Ariel Excel Gel with our Eco Cycles for the best results.

Eco Cycles

Cottons

For everyday cleaning needs for cotton or linen items.

Synthetics

Designed to wash a variety of man-made fibre mixtures.

Fast Wash

A fast cycle for everyday mixed fabrics that need a freshen up or are only slightly dirty, in just 30 minutes.

Set and Forget sensor drying

Our Set and Forget drying system uses sensors to monitor the moisture and temperature levels inside the drum of the machine, so that based on the choice of drying level you make (Iron, Hanger or Cupboard Dry), the machine senses when the load is dry. Not only convenient for you, sensor drying ensures maximum energy efficiency, by ensuring that the machine stops when the clothes reach the drying level selected.

Iron Dry

This drying setting leaves a level of moisture within the clothes, helping to make the ironing easier, which is particularly useful for garments such as shirts.

Hanger Dry

This medium drying level is ideal for garments which don't need to be ironed and can simply be placed on a hanger to finish drying.

Cupboard Dry

The drying programme will end when the sensors detect very little moisture inside the drum, meaning the garments are almost completely dry and ready to put away.

BHWM129

Key Features

Spin Speed: 1200rpm
 Number of Wash Programmes: 16
 Wash Programmes include:
 Shirts, Lingerie, Baby Cycle, Delicates
 3 Eco Cycles:
 Cottons, Synthetics & Fast Wash

 LED Programme Progress Indicators

Built-In Washer Dryer

Refrigeration

Cooling Features

Fully Frost Free

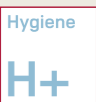

Means exactly what it says, no more defrosting ever. And there's more good news, food stays fresher longer due to the circulation of cold air in both the fridge and the freezer preventing the build up of ice.

Ice Care

With common sense and practical design in mind, we have set our ice trays neatly into the drawers of the freezer. This gives you easy access to ice cubes and more storage space for your food.

Antibacterial Protection

Antibacterial Protection is built into our fridge liners giving protection for the life of the product. Working between normal cleanings it inhibits the growth of potentially harmful bacteria and reduces odours.

Cooling Features

Holiday Setting

Save energy while you are away. Holiday Setting allows the freezer to keep running as normal whilst the fridge is set to 12°C when empty with the door closed. This prevents any unpleasant odours and energy consumption is minimal.

Ice Party

Lukewarm wine and frozen bottles stay off the menu with Ice party. White wine or champagne is quickly chilled to its ideal serving temperature and a discreet signal lets you know when it can be served.

Wine Rack

Provides chilled wine, ready to drink thanks to our accommodating rack that has space for multiple bottles.

Super Cool and Super Freeze

After a big shopping trip or cooking session, a large number of new items in the fridge or freezer cause the internal temperature to rise. Use Super Cool in the fridge to quickly cool the temperature back to the optimum level. Use Super Freeze in the freezer to quickly freeze fresh food, keeping it as fresh as the day you bought it.

A+ Energy Rating

The majority of Hotpoint's refrigeration is A energy rated but we also have models with an A+ rating that will save an additional 25% energy compared to A rated. Helps the environment and your bank balance.

Energy Saving Recommended

For the most energy efficient products, look for the Energy Saving Recommended logo. Hotpoint's A+ energy efficient products are recommended by the Energy Saving Trust.

Fridge Drawers

This revolutionary award-winning design gives easier access to contents with a modern stylish look.

Styled to match the latest kitchen designs with wide deep drawers, the fridge drawers are a stunning addition to your kitchen. You can use with either Hotpoint Experience Steel drawer fronts or with cabinetry doors that match your kitchen.

The Hotpoint fridge drawers are no compromise on capacity. At 90cm wide they hold as much as the fridge compartment in a conventional fridge freezer. And with flexible storage solutions like 2 salad crispers, 2 fish/meat boxes, dairy box, bottle holder and wine rack, they're practical too.

NCD191I

Key Features

- 90cm Wide
- 2 Individual Drawers with Soft Close Mechanism
- Total Capacity: 190 Litres
- Wine Rack
- Adjustable Legs
- Easily Installed Under Work Surface
- Additional Accessories Included
- 2 Salad Crispers
- 2 Fish/Meat Boxes
- Dairy Box
- Bottle Holder
- Interior Light

Fridge Drawers

Finish: Requires Cabinetry Doors or Stainless Steel Panels **EDR36X** (Optional).

Wine Cellar

For true wine lovers, the Hotpoint Wine Cellar is the perfect solution for good wine storage. Temperature is the greatest concern when storing wine so sit back and relax whilst the Hotpoint Wine Cellar takes care of your wine, ensuring perfect storage and serving conditions every time.

Of course, the Hotpoint wine cellar is a lot more than just for storage. A lot of the enjoyment of wine comes from the aroma, and you only get the right aroma if the wine is served at the correct drinking temperature. With the adjustable thermostat in the Wine Cellars, you can make sure your wine is at the ideal temperature for serving, so for most white wines it will be around 7°C, for light-bodied reds and dessert wines it will be around 10°C, and for more robust red wines it will be around 15-17°C.

WE26

Key Features

- Stores up to 46 Bottles
- Electronic Thermostat
- Temperature Regulation from +5°C to +20°C
- Internal Temperature & Working Indicator Display
- Internal Fan to Maintain Constant Air Temperature
- Anti-Condensation System
- Can be Built-In or Built-Under
- Tinted Glass and Black Interior to Reduce Light Transmission/Reflection Preserving the Wine for Longer

Wine Cellar

Finish: Stainless Steel (X) - Fingerprint Resistant.

In accordance with its policy of progressive product design and environmental protection, Indesit Company reserves the right to alter specifications and use quality recycled components. To confirm that the specification and / or functions required are still current on the selected model, please call our product information team on 08000 92 19 22 (If calling within the Republic of Ireland please call 0818 36 50 08) prior to purchase. Every attempt has been made to ensure an accurate colour representation.

Our Commitment to Customer Care

Call us at your convenience – 364 days a year

Hotpoint service is second to none. We are open when you need us and our operators are on hand to answer your call every day including weekends and bank holidays on **08448 22 42 24** (if calling within the Republic of Ireland please call **0818 31 34 13**). Alternatively book online any time at www.hotpointservice.co.uk

Appointments to suit you

We do everything possible to fit in with your busy lifestyle. You can choose between morning or afternoon appointments, with the option of the engineer's first or last visit of the day. Saturday appointments are also available in most areas.

Local engineers nationwide

We are the largest white goods service team in the United Kingdom & Republic of Ireland with fully trained Hotpoint specialists to ensure you receive fast, reliable and local service.

Professional workmanship – by the experts

Our engineers are professionally trained at the Hotpoint School of Excellence and receive continuous training to ensure they are up-to-date with the latest products. We only fit genuine Hotpoint replacement parts and guarantee our work for a full 90 days.

Guaranteed free parts for 5 years

Your Hotpoint appliance is covered for a full 12 months by our own parts and labour warranty. In addition, when you register your appliance we also provide free parts for the first 5 years when fitted by our highly qualified engineers. Please call **08448 24 24 24** for more information (if calling within the Republic of Ireland please call **012 30 02 33**).

Your peace of mind with total protection

We offer a selection of repair protection plans that will enable you to fully cover any number of Hotpoint appliances – after your warranty expires – including new for old product replacement in the event they cannot be repaired. Please call **08448 22 62 26** for more information (if calling within the Republic of Ireland please call **012 30 02 33**).

Caring for your Hotpoint appliance

We have a wide range of accessories to protect and enhance your appliance as well as Professional Home Care cleaning products to keep it looking good and functioning efficiently throughout its life. Please see the product specifications guide for more information.

Satisfaction guaranteed

Within the first 90 days of ownership we have a dedicated team who provide free of charge advice and assistance to deal with your enquiries quickly and efficiently. In the unlikely event that a technical problem occurs that cannot be resolved in this period we will either replace your appliance or arrange for a full refund.

We're here for you, call us on

Our Commitment to the Environment

FSC accredited material production

This brochure is FSC accredited, which means the paper has been sourced from responsibly managed and sustained forest resource. The Forest Stewardship Council (FSC) promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests. Alternatively, you can always choose to view our electronic brochures online at www.hotpoint.co.uk or www.hotpoint.ie

Energy Saving Recommended products

The Energy Saving Trust is one of the UK's leading organisations tackling climate change and they will only recommend products that are the most energy efficient. Look out for the Energy Saving Recommended logo on a range of Hotpoint home appliance products to ensure you select the most energy efficient product that best suits your lifestyle.

Reducing paper consumption

Each Hotpoint home delivery driver has now been equipped with a new 'Track & Trace' handheld device that enables quick and simple customer signature approval completely replacing the need for paper copies. We estimate by implementing the new 'Track & Trace' system into our business we will save the equivalent of 5 tonnes of paper on an annual basis. A small initiative with a big impact!

Recycled parts

Hotpoint are committed to generating environmental benefits wherever possible during the manufacturing process. Latest developments in association with WRAP (Waste & Resources Action Programme) have been focused on trialling the use of a recycled component in selected appliances. The trial demonstrated that it is possible to manufacture new electrical goods from discarded plastic parts from the same source. Hotpoint will continue to explore these innovations and be at the forefront of integrating them into our manufacturing process wherever possible.

Advanced technological features

Whether it's our energy saving Eco Cycles on our washing machines, A+ in energy efficiency or our Holiday Setting on our Refrigeration models, we have an array of intelligent energy saving features and settings across our product ranges that ensure we are helping you to help the environment when using our products.

Working in partnership

Hotpoint are working in partnership with British Gas and Ariel to bring you the best energy saving products and solutions for your home.

Introducing

Hotpoint's Freestanding Collection

Don't forget we also do a full range of stylish freestanding products. Contact us for our latest Freestanding Catalogue, featuring a full range of laundry, dishwashing, cooking and refrigeration products. Alternatively call in at your local Hotpoint stockist for more information.
